Index to Volume 27

Journal of the Aerospace Sciences

Numbers 1–12, January–December, 1960

No. 1, January, pages 1–80
No. 2, February, pages 81–160
No. 3, March, pages 161–240
No. 4, April, pages 241–320
No. 5, May, pages 321–400
No. 6, June, pages 401–480
No. 7, July, pages 481–560
No. 8, August, pages 561–640
No. 9, September, pages 641–720
No. 10, October, pages 721–800
No. 11, November, pages 801–880
No. 12, December, pages 881–976

The material has been indexed in two sections: under a subject heading and by author.

* An asterisk following an item identifies it as having appeared in the Readers' Forum section.

Subject Index

AERODYNAMICS AND FLUID MECHANICS

Dimensionless Parameters for Viscous Similarity, Andrew G. Hammitt* ... 720
An Equivalence Principle for Water-Exit and -Entry Problems, John P. Moran* ... 876
An Exact Calculation of Some Steady, Diabatic, Two-Dimensional Fields of Compressible Flow, Bruce L. Hicks and Donald R. Chenoweth* ... 142
The Flow About a Charged Body Moving in the Lower Ionosphere, Raul R. Hunziker ... 935
Flow About an Unsteadily Rotating Disc, E. M. Sparrow and J. L. Gregg ... 252
Comment, Pau-Chang Lu* ... 958
The Hydraulic Analogy for External Flow, R. A. A. Bryant* 148
Influence Coefficients for Real Gases, Mario William Cardullo* ... 546
On Almost-Free-Molecule Flow Through an Orifice, V. C. Liu and G. R. Inger* ... 875
Note on the Turbulent Shear Stress Near a Wall, H. G. Elrod, Jr. (Vol. 24, p. 468)*
Erratum* ... 145
On an Exact Solution of Laminar Mixing of Two Different Gases, Luigi G. Napolitano* ... 144
Propagation of Weak Disturbances in a Gas Subject to Relaxation Effects, Franklin K. Moore and Walter E. Gibson ... 117
Rarefaction Effects in Low-Speed Turbulence, Harold S. Mickley and Anthony Turano, Jr.* ... 629
Remarks on the Eddy Viscosity in Compressible Mixing Flows, Lu Ting and Paul A. Libby* ... 797
Steady Performance Characteristics of Gas-Lubricated Journal Bearings With Slenderness Ratio $L/D = \pi$, W. A. Gross* ... 869

Bodies

An Approximate Solution of the Direct Supersonic Blunt-Body Problem for Arbitrary Axisymmetric Shapes, Stephen C. Traugott ... 361
Approximate Solutions for Supersonic Flow Over Wedges and Cones, A. G. Hammitt and K. R. A. Murthy* ... 71
Arc-Tangent Fits for Pressure and Pressure-Drag Coefficients of Axisymmetric Blunt Bodies at All Speeds, Ta Li* 309
A Comparison of Blunt-Body Flow-Field Results, Herbert W. Ridyard* ... 789
Computer Solution Techniques for Two-Dimensional Supersonic Flow Problems, William P. Harrison, Jr.* ... 315
The Effect of Thermal Radiation on the Inviscid Hypersonic Flow Over a Blunt Body, G. A. Bird* ... 713
Empirical Equation for the Wake-Spreading Limits Behind Three-Dimensional Bodies, W. J. Billerbeck, Jr.* ... 640
An Extension of the Linearized Characteristics Method for Calculating the Supersonic Flow Around Elliptic Cones, Anthony Martellucci ... 667
Fluctuating Lift and Drag Acting on a Cylinder in a Flow at Supercritical Reynolds Numbers, Y. C. Fung ... 801
Heat Transfer, Recovery Factor, and Pressure Distributions Around a Circular Cylinder Normal to a Supersonic Rarefied-Air Stream, O. K. Tewfik and W. H. Giedt ... 721
Inviscid Hypersonic Flow Over Unyawed Circular Cones, L. Pottsepp* ... 558
A Multiple Hot-Wire Array for Measurements of Downwash Integrals, Kent Kresa and Erik Mollö-Christensen* 141
On Conical-Flow Upwash, Joseph L. Sims* ... 952
On the Use of the Boundary-Layer Equations in the Hypersonic Viscous-Layer Regime, Robert A. Makofski* ... 468
Real Gas Effects in Flow Over Blunt Bodies at Hypersonic Speeds, H. T. Nagamatsu, R. E. Geiger, and R. E. Sheer, Jr. ... 241
Relation Between Transition Location and Pressure in Separated Shear Flows, J. Leith Potter and Jack D. Whitfield* ... 712
Second-Order Theory for Unsteady Supersonic Flow Past Slender, Pointed Bodies of Revolution, James D. Revell 730
A Simple Numerical Solution of the Supersonic Blunt-Body Problem for Real Gases, G. A. Bird* ... 151
Solution to the Flow About a Two-Dimensional Flat Plate at Infinite Mach Number, Donald L. Chubb* ... 68
Supersonic Flow at the Surface of a Circular Cone at Angle of Attack, Joseph E. Willett ... 907
Theoretical and Experimental Investigation of Second-Order Supersonic Wing-Body Interference, Mårten Landahl, Georg Drougge, and Beverly Beane ... 694
The Use of Rational Approximations in the Calculation of Flows With Detached Shocks, A. H. Van Tuyl* ... 559
Use of Reference Enthalpy in Specifying the Laminar Heat-Transfer Distribution Around Blunt Bodies in Dissociated Air, E. R. G. Eckert and O. E. Tewfik* ... 464
Viscous Aerodynamic Characteristics in Hypersonic Rarefied Gas Flow, Ronald F. Probstein and Nelson H. Kemp ... 174
Addendum and Errata* ... 554

Viscous and Leading-Edge Effects in Hypersonic Flow, Robert J. Whalen* ... 391

Boundary Layer

An Analogy Between Boundary-Layer Pressure Gradient and Chemical Reaction-Rate Effects, George R. Inger* 956
Analysis of Further Data on the Effect of Isolated Roughness on Boundary-Layer Transition in Supersonic Flow, Darwin W. Clutter and A. M. O. Smith* ... 70
An Approximate Investigation of the Effect of Boundary-Layer-Control Pumping on Powerplant Performance, T. F. Kirkwood* ... 799
Boundary-Layer Stabilization by Distributed Damping, Max O. Kramer* ... 69
Boundary-Layer Transition and Heat Transfer in Shock Tubes, R. A. Hartunian, A. L. Russo, and P. V. Marrone 587
Boundary-Layer Transition Measurements at Mach Numbers from 5.4 to 7.4, Fred Landis, Martin R. Fink, and Murray H. Rosenberg* ... 719
Boundary-Layer Transition on Blunt Bodies With Highly Cooled Boundary Layers, Kenneth F. Stetson ... 81
The Effect of Controlled Three-Dimensional Roughness on Boundary-Layer Transition at Supersonic Speeds, E. R. van Driest and W. D. McCauley ... 261
An Experiment on Oscillatory Shock-Wave Boundary-Layer Interaction, Wladyslaw Fiszdon and Erik Mollö-Christensen* ... 71
Experimental Evaluation of Heat Transfer With Transpiration Cooling in a Turbulent Boundary Layer at M = 3.2, E. Roy Bartle and Bernard M. Leadon* ... 78
First-Order Solution to the Compressible Laminar Boundary Layer in Slip Flow, Anthony Casaccio* ... 319
A Method of Calculating Velocity Distribution for Turbulent Boundary Layers in Adverse Pressure Distributions, Earl M. Uram ... 659
A Note on the Recovery and Reynolds-Analogy Factors in Laminar Flat-Plate Flow, D. A. Spence* ... 878
On a Solution to the Unsteady Laminar Boundary Layer, H. A. Hassan* ... 474
On Maximum Pressure Rise With Turbulent Boundary Layer, A. Mager and A. W. Goldstein* ... 234
On the Effects of Flow Obstructions on Free-Convection Boundary-Layer Oscillations, J. P. Holman, K. E. Stout, and E. E. Soehngen* ... 463
On the Response of the Laminar Boundary Layer to Small Fluctuations of the Free-Stream Velocity, Nicholas Rott and Martin L. Rosenzweig ... 741
On Three-Dimensional Boundary Layers Having Similar Solutions, M. G. Hall* ... 80
An Optical Boundary-Layer Probe, John W. Daiber ... 836
A Particular Solution to the Turbulent-Boundary-Layer Equations, George K. Walker* ... 715
Pitot-Probe Measurement of Local Skin-Friction Reduction Due to Transpiration in a Low-Speed, Turbulent Boundary Layer, Bernard M. Leadon and E. Roy Bartle* ... 235
A Rapid Method for Estimating the Shear Stress and the Separation Point in Laminar Incompressible Boundary-Layer Flows, Andreas Acrivos* ... 314
Reynolds-Analogy Parameter for the Laminar Boundary Layer With Blowing, Pr = 3/4, C. R. Faulders* ... 628
Skin-Friction Calculation for Turbulent Boundary Layers in Adverse Pressure Distributions, Earl M. Uram* ... 75
A Sublayer Theory for Fluid Injection Into the Incompressible Turbulent Boundary Layer, Donald L. Turcotte ... 675
Sweepback Effects in Turbulent Boundary-Layer Shock-Wave Interaction, R. J. Stalker ... 348
A Theoretical Investigation of the Interaction Between Shock Waves and Boundary Layers, M. Honda (Vol. 25, pp. 667–678)
Erratum* ... 76
Transition in a Separated Laminar Boundary Layer, B. H. Lochtenberg ... 92
Use of the Roughness Criterion to Refute Roughness as the Cause of Reported Transition Reversal, Jerold M. Bidwell* ... 622

Internal Flow

Derivation of an Analytical Expression for Supersonic Spillage of Single-Cone Inlets, Craig W. Hartsell* ... 788
Note on Slow Viscous Flow Through the Space Between Two Coaxial Circular Cones With the Same Vertex, T. K. Chaudhury* ... 963
The Piston-Driven Shock, Roy Gundersen* ... 467
Supersonic Inlet Dynamics, H. R. Fraiser ... 429

Nozzles, Orifices, and Jets

An Approximation for Subsonic Flow Through an Orifice, P. G. Morgan* ... 160
A Further Discussion of the Limiting Circulatory Lift of a Finite-Span Wing, Franklyn J. Davenport* ... 959
On Almost-Free-Molecule Flow Through an Orifice, V. C. Liu and G. R. Inger* ... 875
On the Thrust Hypothesis for the Jet Flap Including Jet-Mixing Effects, K. T. Yen ... 607
Remarks on a Study of Short, Flexible Nozzles, Edwin Pounder and John Copper* ... 73

Shock Waves

Calculation of Flow-Variable Gradients Behind Curved Shock Waves, Nathan Gerber and Joan M. Bartos* ... 958
An Experiment on Oscillatory Shock-Wave Boundary-Layer Interaction, Wladyslaw Fiszdon and Erik Mollö-Christensen* ... 71
A Graphical Solution for Normal Shock Waves in Real Gases, Charles E. Treanor* ... 158
Higher-Order Corrections to Taylor's Solution for Weak, Normal, Shock Waves, Martin Sichel* ... 635
A Note on the Explosion Solution of Sedov With Application to the Newtonian Theory of Unsteady Hypersonic Flow, N. C. Freeman* ... 77
Comments, Eric F. Brocher* ... 955
Author's Reply* ... 956
Note on the Sonic Freeze Concept, J. C. Gibbings* ... 874
On the Normal Shock Wave Attached to the Curved Surface, G. E. Gadd* ... 76
The Piston-Driven Shock, Roy Gundersen* ... 467
A Simple Numerical Solution of the Supersonic Blunt-Body Problem for Real Gases, G. A. Bird* ... 151
A Theoretical Investigation of the Interaction Between Shock Waves and Boundary Layers, M. Honda (Vol. 25, pp. 667–678)
Erratum* ... 76
A Three-Dimensional Linearized Analysis of the Forces Exerted on a Rigid Wing by a Shock Wave, F. Edward Ehlers and E. M. Shoemaker ... 257

Sloshing of Liquids

Sloshing of Liquids in Circular Canals and Spherical Tanks, Bernard Budiansky ... 161

Turbomachinery

An Approximate Equation for the "Choke-Line" of a Compressor, G. T. Csanady* ... 637
Effects of Flow Unsteadiness in Turbomachines, G. T. Csanady* ... 879
The Flow Field in the Diffuser of a Radial Compressor, Inge L. Ryhming* ... 798
Jet-Compressor Efficiencies as Influenced by the Nature of the Driving and Driven Gases, Suzanne S. Eichacker and Harold J. Hoge* ... 636

Vortices

Generalized Integral Relationship in Flow Fields With Vortex Sheets, Shinya Kobayakawa and Lu Ting* 872
On the Structure of Vortical Layers in Supersonic and Hypersonic Flows, Hsien K. Cheng* 155
A Simple Method of Estimating the Vortex Intensity, Miles J. Bobrik* 957
A Study of Vortex Cancellation, Allan Schaffer 193

Wings and Airfoils

Aerodynamic Properties of Ring Airfoils in Supersonic Flight, Charles H. Murphy and Maynard J. Piddington* 954
A Further Discussion of the Limiting Circulatory Lift of a Finite-Span Wing, Franklyn J. Davenport* 959
The Limiting Circulatory Lift of a Wing of Finite Aspect Ratio, Barnes W. McCormick, Jr. (Vol. 26, pp. 247–248)* Comments, G. J. Hancock* 65
Author's Reply, Barnes W. McCormick, Jr.* 66
Minimum Wing Wave Drag With Volume Constraint, T. Strand 615
On Supersonic Flow Past Thick Airfoils, Abraham Kogan. 504
On the Prediction of Mixed Subsonic/Supersonic Pressure Distributions, Colin S. Sinnott 767
On the Thrust Hypothesis for the Jet Flap Including Jet-Mixing Effects, K. T. Yen 607
On the Unsteady Motion of a Delta Wing in Supersonic Flight, M. M. Stanišić* 399
Sweepback Effects in Turbulent Boundary-Layer Shock-Wave Interaction, R. J. Stalker 348
A Three-Dimensional Linearized Analysis of the Forces Exerted on a Rigid Wing by a Shock Wave, F. Edward Ehlers and E. M. Shoemaker 257
Theoretical and Experimental Investigation of Second-Order Supersonic Wing-Body Interference, Mårten Landahl, Georg Drougge, and Beverly Beane 694
Wings With Minimum Drag Due to Lift in Supersonic Flow, Ingeborg Ginzel and Hans Multhopp 13

AEROELASTICITY

Application of Power Spectral Methods in Airplane and Missile Design, Kenneth R. Thorson and Quentin R. Bohne 107
Chordwise-Bending Effects on Wing-Vibration Modes, John C. Glasgow and James L. Cronin, Jr.* 962
Dynamic Effects in Fatigue Testing, Richard M. Rowland and James L. Cronin* 390
Dynamic Response of Beams With Large Amplitudes, Thein Wah* 877
The Effect of Thrust and Drag Load on the Aeroelastic Behavior of Booster Systems, John E. Stevens* 639
The Equation of Energy Balance for Fluttering Systems With Some Applications in the Supersonic Regime, John D. C. Crisp (Vol. 26, pp. 703–716, 738) Errata* 73
Flexural Vibrations of a Thick-Walled Circular Cylinder According to the Exact Theory of Elasticity, Joshua E. Greenspon 37
Flexural Vibrations of Elastic Sandwich Plates, Yi-Yuan Yu 272
High-Frequency Oscillation of Slender Bodies and Wings, Meir Hanin* 544
Inertia Effects on Some Static Aeroelastic Problems, D. J. Johns* 237
The Influence of Panel Deformations on Wing Flutter, D. J. Johns* 137
A Method of Reducing Aeroelastic Effects of Highly Swept Wings, Edward J. Hopkins, Don W. Jillie, and Raymond M. Hicks* 634
Natural Frequency of Beams With Variable Moments of Inertia, Ming L. Pei* 304
A Note for Finding Complex Roots of a Special Kind of Quartic Equation, F. A. Lee* 714
On Supersonic Flutter of Long Panels, John W. Miles* 476
On the Bernoulli-Euler Beam Theory With Random Excitation, J. L. Bogdanoff and J. E. Goldberg 371
On the Estimation of Structural Damping From Aircraft Resonance Tests, Ronald D. Milne 339
Optimization of the Flight-Control, Airframe System, I. L. Ashkenas and D. T. McRuer 197
Oscillatory Aerodynamic Coefficients for a Unified Supersonic-Hypersonic Strip Theory, William P. Rodden and James D. Revell 451
Real Gas Effects in Flow Over Blunt Bodies at Hypersonic Speeds, H. T. Nagamatsu, R. E. Geiger, and R. E. Sheer, Jr. 241
A Simplified Expression for the Period of Nonlinear Oscillations of Curved and Flat Panels, Joshua E. Greenspon*. 138
Comment, Robert E. Kelley* 621
Simplified Vibration Analysis of Elastic Sandwich Plates, Yi-Yuan Yu 894
Traveling-Gust Method for Airfoils in Strong Blast Waves, J. Ray Ruetenik* 795

AEROTHERMODYNAMICS AND ABLATION

Ablation of Reinforced Plastics in Supersonic Flow, George W. Sutton 377
An Analogy Between Boundary-Layer Pressure Gradient and Chemical Reaction-Rate Effects, George R. Inger*. 956
Calculation of Hypersonic Shock-Layer Flow Parameters, Knowing Shock-Layer Ratio of Specific Heats, Alfred B. C. Anderson* 873
A Comparison of Transient and Quasi-Steady Performance of Melting-Type Re-Entry Shields, Ernst Wilhelm Adams* 791
Differential Equation of Compressible Turbulent Skin-Friction Coefficient Around an Arbitrary Body of Revolution at High Speed, Paul K. Chang* 466
Dynamics and Thermodynamics of Re-Entry, W. H. T. Loh 748
The Effect of a Deceleration Force on a Melting Boundary Layer, Simon Ostrach, Arthur W. Goldstein, and Jesse Hamman* 626
The Effect of Shock-Generated Vorticity, Surface Slip, and Temperature Jump on Stagnation-Point Heat-Transfer Rates, H. Hoshizaki* 135
The Effect of Thermal Radiation on the Inviscid Hypersonic Flow Over a Blunt Body, G. A. Bird* 713
An Experimental and Theoretical Study of Quartz Ablation at the Stagnation Point, Mac C. Adams, William E. Powers, and Steven Georgiev 535
Experimental Study of an Ablating Sphere With Hydromagnetic Effect Included, John H. Boynton* 306
Heat Conduction in a Melting Slab, Stephen J. Citron 219
Heat Transfer, Recovery Factor, and Pressure Distributions Around a Circular Cylinder Normal to a Supersonic Rarefied-Air Stream, O. K. Tewfik and W. H. Giedt 721
An Investigation of Laminar, Transitional, and Turbulent Heat Transfer on Blunt-Nosed Bodies in Hypersonic Flow, Robert J. Cresci, Donald A. MacKenzie, and Paul A. Libby 401
Inviscid Flow With Nonequilibrium Molecular Dissociation for Pressure Distributions Encountered in Hypersonic Flight, Martin H. Bloom and Martin H. Steiger 821
Mach-Line Determination for Air in Dissociation Equilibrium, Roy J. Heyman* 311
Comments, Eldon L. Knuth* 796
Mass-Transfer Cooling in a Turbulent Boundary Layer, J. P. Hartnett, D. J. Masson, J. F. Gross, and Carl Gazley, Jr.* 623
Measurements of Skin Friction of the Compressible Turbulent Boundary Layer on a Cone With Foreign Gas Injection, Constantine C. Pappas and Arthur F. Okuno 321
A New Concept for Calculating Thermal Boundary Layers, Ernst Wilhelm Adams* 549

Pitot-Probe Measurement of Local Skin-Friction Reduction Due to Transpiration in a Low-Speed, Turbulent Boundary Layer, Bernard M. Leadon and E. Roy Bartle* 235
Propagation of Weak Disturbances in a Gas Subject to Relaxation Effects, Franklin K. Moore and Walter E. Gibson 117
Radiation Versus Mass-Transfer Effects for Ablating Re-Entry Shields of a Nonlifting Satellite, Ernst Wilhelm Adams* 868
Skin-Friction Calculation for Turbulent Boundary Layers in Adverse Pressure Distributions, Earl M. Uram* 75
Some Mass-Transfer Results With External-Flow Pressure Gradients, J. R. Baron and P. E. Scott* 625
Some Real-Gas Flow Parameters for Air, Wayne D. Erickson* 716
The Stagnation-Point Ablation of Teflon During Hypersonic Flight, S. M. Scala and N. S. Diaconis* 140
Stagnation-Point Heat-Transfer Measurements in Hypersonic, Low-Density Flow, S. E. Neice, R. W. Rutowski, and K. K. Chan* 387
Steady-State Melting of a Semi-Infinite Medium With Temperature-Dependent Properties, Stephen J. Citron* 470
Sublimation in a Hypersonic Environment, Sinclaire M. Scala 1
Temperature Profiles in a Finite Solid With Moving Boundary, C. Forbes Dewey, Jr., Stewart I. Schlesinger, and Lawrence Sashkin 59
The Thickness of a Melting Ablation-Type Heat Shield, Ernst Wilhelm Adams* 620
Turbulent Heat Transfer on Blunt-Nosed Bodies in Two-Dimensional and General Three-Dimensional Hypersonic Flow, Roberto Vaglio-Laurin 27
Use of Reference Enthalpy in Specifying the Laminar Heat-Transfer Distribution Around Blunt Bodies in Dissociated Air, E. R. G. Eckert and O. E. Tewfil.* 464
Viscous Hypersonic Similitude for a Dissociating Gas, Robert J. Whalen* 550

COMPUTERS AND ANALOGY

An Analogy Between Magnetohydrodynamics and Heat Transfer, D. C. Leigh and G. W. Sutton* 469
The Analysis of Redundant Structures by the Use of High-Speed Digital Computers, Walter J. Crichlow and Gernot W. Haggenmacher 595
Computer Solution Techniques for Two-Dimensional Supersonic Flow Problems, William P. Harrison, Jr.* 315
The Epicycle Method for the Reduction of Flight-Test Data Using a Digital Computer, R. P. Danis 913
Shear Lag Solutions for Sheet-Stringer Panels by Means of a Hydrodynamic Analogy, Martin Goland 291

CONTROL

Closed-Loop Flip-Flop Control Systems, Milton Rogers and George Shapiro 841
Multicondition Terminal Control Systems for Aircraft, Richard V. Morris and Carl W. Steeg, Jr. 703
Optimization of the Flight-Control, Airframe System, I. L. Ashkenas and D. T. McRuer 197
The Response of Linear Systems to Non-Gaussian Random Inputs, Stephen H. Crandall, William H. Siebert, and Bernard P. Hoquetis* 154
A Statistically Averaged Error Criterion for Feedback-System Synthesis, John Zaborszky and John W. Diesel. 128
The Transfer Function of a Spring-Tab Control. Malcolm J. Abzug* 307

FLIGHT DYNAMICS AND PERFORMANCE

The Approximate Solution of the Equations of Motion of an Airplane Moving in a Vertical Plane, E. F. Trombley* .. 394
An Axis System for Five and Six Degree of Freedom Airplane Dynamic Problems, William L. Wynn* 473
Minimum Time-to-Climb of an Airplane, John Carstoiu* .. 311

INSTRUMENTS

Foucault Pendulum Effect in a Schuler-Tuned System, Charles Broxmeyer 343
Multicondition Terminal Control Systems for Aircraft, Richard V. Morris and Carl W. Steeg, Jr. 703
The Pitot and Static Tubes—Condensed Sources of General Fundamentals and Applications, Jay W. Stuart, Jr.* 136

LANDING GEAR

Slip Coefficient for a Tire, John E. Stevens* 305

MAGNETOHYDRODYNAMICS

An Analogy Between Magnetohydrodynamics and Heat Transfer, D. C. Leigh and G. W. Sutton* 469
Compressible Flat-Plate Boundary-Layer Flow With an Applied Magnetic Field, William B. Bush 49
Compressibility Effects in Magnetoaerodynamic Flows Past Thin Bodies, J. E. McCune and E. L. Resler, Jr. 493
Constant-Temperature Magneto-Gasdynamic Channel Flow, Jack L. Kerrebrock and Frank E. Marble* 78
Electrogasdynamic Motion of a Charged Body in a Plasma, L. Kraus and H. Yoshihara 229
Experimental Study of an Ablating Sphere With Hydromagnetic Effect Included, John H. Boynton* 306
The Flow About a Charged Body Moving in the Lower Ionosphere, Raul R. Hunziker 935
Hydromagnetic Effects on Heating and Shear at a Three-Dimensional Stagnation Point in Hypersonic Flow, Nelson H. Kemp* 553
Hypersonic Viscous Flow Near the Stagnation Point in the Presence of Magnetic Field, Ching-Sheng Wu 882
Incompressible Wedge Flows of an Electrically Conducting Viscous Fluid in the Presence of a Magnetic Field, K. T. Yen 74
Magnetohydrodynamic Effects on Exothermal Waves, R. A. Gross, W. Chinitz, and T. J. Rivlin 283
Magnetohydrodynamic Effects on the Formation of Couette Flow, L. N. Tao 334
On Magnetohydrodynamic Channel Flow, J. E. McCune and W. R. Sears* 139
On the High-Speed Flow of a Compressible Conductive Fluid Past a Slender Body, Ken-ichi Kusukawa* 551
A Phenomenon in Unsteady Magnetohydrodynamic Flow Theory, S. F. Borg* 472
A Possible "Fully Developed" Hydromagnetic Pipe Flow, A. Demetriades* 388
Similar Solutions for Boundary Layers in Constant-Temperature Magneto-Gasdynamic Channel Flow, Jack L. Kerrebrock* 156

MATERIALS

Ablation of Reinforced Plastics in Supersonic Flow, George W. Sutton 377
A Comparison of Transient and Quasi-Steady Performance of Melting-Type Re-Entry Shields, Ernst Wilhelm Adams* 791
An Experimental and Theoretical Study of Quartz Ablation at the Stagnation Point, Mac C. Adams, William E. Powers, and Steven Georgiev 535
On Theoretical Considerations of Plastic-Flow Criteria, W. Komkov* 477
Radiation Versus Mass-Transfer Effects for Ablating Re-Entry Shields of a Nonlifting Satellite, Ernst Wilhelm Adams* 868
The Stagnation-Point Ablation of Teflon During Hypersonic Flight, S. M. Scala and N. S. Diaconis* 140
Steady-State Melting of a Semi-Infinite Medium With Temperature-Dependent Properties, Stephen J. Citron* 470
Sublimation in a Hypersonic Environment, Sinclaire M. Scala 1
The Thickness of a Melting Ablation-Type Heat Shield, Ernst Wilhelm Adams* 620

MATHEMATICS

A Further Extension of the Routh-Hurwitz Stability Criteria for Quintic and Sextic Equations, Herbert Saunders* 396
A Note for Finding Complex Roots of a Special Kind of Quartic Equation, F. A. Lee* 714

POWER PLANTS

An Approximate Investigation of the Effect of Boundary-Layer-Control Pumping on Powerplant Performance, T. F. Kirkwood* 799
A Method of Estimating the Environmental Damping Coefficient of a Rotating Disc, P. Srinivasan* 312
Performance of Nuclear Rocket for Large-Payload, Earth-Satellite Booster, Eldon W. Sams 481
The Strain Analysis of Solid Propellant Rocket Grains, M. L. Williams 574
Variable-Thrust Rocket Engines and Their Modes of Operation, Mario William Cardullo* 793

PROPELLERS

Theory of Supersonic-Propeller Aerodynamics, Donald Earl Ordway and Richard W. Hale 437

SPACECRAFT

Analytical and Numerical Studies of Three-Dimensional Trajectories to the Moon, A. B. Mickelwait and R. C. Booton, Jr. 561
A Class of Optimum Trajectory Problems in Gravitational Fields, E. W. Graham 296
Closed-Loop Flip-Flop Control Systems, Milton Rogers and George Shapiro 841
Dynamics and Thermodynamics of Re-Entry, W. H. T. Loh 748
The Effect of Thrust and Drag Load on the Aeroelastic Behavior of Booster Systems, John E. Stevens* 639
The Epicycle Method for the Reduction of Flight-Test Data Using a Digital Computer, R. P. Danis 913
An Equivalence Principle for Water-Exit and -Entry Problems, John P. Moran* 876
A Graphical Approach to the Determination of the Eccentricity and the Perigee Angle, Wayne Tempelman* 630
Minor Circle Flight at Large Angles of Inclination, W. H. T. Loh* 397
On a Class of Variational Problems in Rocket Flight, G. Leitmann (Vol. 26, p. 586)
Comment, G. Leitmann* 153
Performance of Nuclear Rocket for Large-Payload, Earth-Satellite Booster, Eldon W. Sams 481
Terminal Guidance System for Satellite Rendezvous, W. H. Clohessy and R. S. Wiltshire 653
Two Analytical Results of Fin-Stabilized Rocket Trajectory Under Quadratic Drag Law, K. S. Sung and C. Park* 388

STRUCTURES

Analysis of Low-Aspect-Ratio Aircraft Structures, Charles H. Samson, Jr., and Heinrich W. Bergmann 679
The Analysis of Redundant Structures by the Use of High-Speed Digital Computers, Walter J. Crichlow and Gernot W. Haggenmacher 595
An Approximation to the Deflections and Strains in a Uniformly Loaded, Clamped, Rectangular Panel Subjected to Very Large Plastic Deformations, Joshua E. Greenspon* 392
Bending of an Orthotropic Plate Clamped on the Boundary of a Conic Section, Y. Ōhasi and T. Suzuki* 386
The Buckling of Circular Cylindrical Shells Under Purely Random External Pressures, J. Clifton Samuels 943
Concerning the Torsion of Prismatic Bars Having a Hexagonal Cross-Section, M. M. Stanišić, C. A. Hauck, and R. A. Mathias* 631
Creep Deformation and Stresses in Pressurized, Long Cylindrical Shells, M. P. Bieniek and A. M. Freudenthal 763
The Creep Deformation of Symmetrically Loaded Circular Cylindrical Shells, Anthony E. Gemma* 953
The Divergence of Supersonic Linear Viscoelastic Lifting Surfaces Including Chordwise Bending, Harry H. Hilton 926
Elastic Instability of a Cylindrical Shell Under Arbitrary Circumferential Variation of Axial Stress, P. P. Bijlaard and R. H. Gallagher 854
Further Studies on the Local Elastic Deformations of Honeycomb Faceplate Subjected to Uniaxial Compression, R. C. Weikel and A. S. Kobayashi* 961
Initially Warped Sandwich Panel Under Combined Loadings, Chieh C. Chang and Bertrand T. Fang 779
Limit Analysis of Multicell Boxes Submitted to Pure Torque, Fernando Venancio Filho* 236
Matrix Solution of the n-Section Column, W. T. Thomson (Vol. 16, pp. 623–624)*
Comments, M. Gololobov* 474
Author's Reply, William T. Thomson* 474
A Method of Transforming Concentrated Surface Forces Into Continuous Surface Forces, William Zuk and Mohammed Abdul Majeed* 478
Minimum Weight Analysis Based on Structural Reliability, Harry H. Hilton and Morris Feigen 641
Minimum Weight Analysis of Orthotropic Plates Under Compressive Loading, George Gerard 21
On Axisymmetrical Buckling of Clamped, Shallow, Spherical Shells, Bernard Budiansky and Hubertus Weinitschke* 545
Plastic Bending of a Work-Hardening Circular Plate With Clamped Edge, Chintsun Hwang 815
Plastic Compressive Buckling of Simply Supported Plates on Interior Elastic Supports, Paul Seide 921
Ring With Edge Moments, Anthony E. Gemma* 867
Shear Lag Solutions for Sheet-Stringer Panels by Means of a Hydrodynamic Analogy, Martin Goland 291
A Simple Method of Matric Structural Analysis: Part V—Structures Containing Plate Elements of Arbitrary Shape and Thickness, Bertram Klein 859
Stability of Flat, Simply Supported Corrugated-Core Sandwich Plates Under Combined Loads, Leonard A. Harris and Richard R. Auelmann 525
Strain-Energy Expressions in Nonlinear Shell Analyses, D. O. Brush* 555
Stress Functions for Plates Bounded by Piecewise Analytic Curves, Ming M. Chen and P. T. Hsu* 240
Tangent-Modulus Column Theory, George Gerard* 627
Torsion Analysis of Multicell Tubes, F. W. Niedenfuhr* 308
Torsion of an Elliptical Shaft With Diametrically Opposite Flat Sides, M. M. Stanišić and B. A. Sherwood* 462

Thermal Stresses

Axisymmetric Bending Stresses in Solid Circular Plates With Thermal Gradients, Marvin Forray and Malcolm Newman* 717
Bending Stresses Due to Temperature in Hollow Circular Plates, Part I, Malcolm Newman and Marvin Forray* 792
Bending Stresses Due to Temperature in Hollow Circular Plates, Part II, Marvin Forray and Malcolm Newman* 870
Bending Stresses Due to Temperature in Hollow Circular Plates, Part III, Malcolm Newman and Marvin Forray* 951
